# Recommended Dell Computers

## To order a recommended Dell computer online:

ResNet recommends that you take the time to review our *2024/2025 Student's Guide for Bringing a Computer to Saint Mary's College*, available on our ResNet website at www.saintmarys.edu/resnet, before selecting a computer for purchase.

**Visit www.dell.com/saintmarys to take advantage of education pricing from Dell.**

Saint Mary's College recommends that new Dell computers be configured to include at least 16GB of memory and at least 512GB of storage. We also recommend including a three-year warranty (with or without accidental damage services) with the purchase of a new Dell computer.

## Why order a recommended Dell computer online?

Saint Mary's Information Technology purchased the Dell Latitude 5550 for College faculty and staff who use Windows computers.

Our recommended Dell models include Windows 11 Pro pre-installed, which is supported by ResNet and compatible with our campus network.

If you choose to buy a new computer that is not one of our recommended models, ResNet strongly recommends purchasing a computer that already has a supported operating system installed. For more information on our supported operating systems, please visit the ResNet website at www.saintmarys.edu/resnet and refer to our *Student's Guide for Bringing a Computer to Saint Mary's College.*

Computers with unsupported operating systems will be unable to receive technical assistance from ResNet, and may not be able to connect to the BelleNet network in the residence halls, access Saint Mary's e-mail, use features of Google's Workspace for Education, or use software required for courses. Chromebooks are not supported by ResNet, and a Chromebook will not meet a student's academic needs at Saint Mary's College.

**A note about Microsoft 365 for Students**: Saint Mary's College offers Microsoft 365 for Students for free to our students. Microsoft Office includes Word, Excel, and PowerPoint. Licenses for the software can be requested online by active students during orientation and when classes are in session for the academic year. Once a license has been assigned, the software can be downloaded directly from Microsoft.

Saint Mary's College also provides free Bitdefender security software to all students for their personally-owned computers.
